→ **663 million people
in the world live
without clean water**

That's almost 1 in 10 people worldwide, or twice the population of the United States.

The majority live in very isolated rural areas and spend many hours every day walking to collect water for their family.

Not only does walking for water keep kids out of school or take up time that parents could be using to earn money, but the water often carries diseases and parasites that can make everyone sick.

However, creating access to clean water means better *education, income and health - especially for women and kids.*

**CLEAN WATER
CAN CHANGE
EVERYTHING!**

EDUCATION

Clean water can help keep kids - especially girls in school.

HEALTH

Every year diseases from dirty water kill more people than all forms of violence, including war. 43% of those deaths are children under five years old.

TIME

In Africa alone, women and children spend 40 billion hours a year walking for water.

EMPOWERING WOMEN

Water issues around the world are mainly a women and children problem. When a community gets water, women and girls get their lives back and can become more productive.

Faith

Faith in God's love allows people to have hope and the courage to live a life of impact.

→ **The Impact**

By participating in GWAM's **A WALK IN HER SHOES FUNDRAISING** campaign, you can help make a big impact on the lives of many living in northern Ghana.

Your funds will be used to drill wells for communities to create opportunities and better health. Your monthly donation of \$39.00 can help to provide water for an entire family.

If your fundraiser generates **\$7,500.00**, a water well will be drilled that will provide water for an **ENTIRE VILLAGE OF 300+ PEOPLE!**

YOU CAN MAKE A DIFFERENCE!
